

GROUPAMA FUTURE FOR GENERATIONS  
BALANCED NC

Sub-fund of a French SICAV

July 2025

Data as of

31/07/2025

The investment management objective is to generate medium-term capital growth over the recommended investment period of more than 3 years. To achieve this, the portfolio manager may invest, through active and discretionary management, mainly in equities and bonds of international companies involved in the energy transition, environmental impact, sustainable consumption and the improvement of living conditions. This product has a sustainable investment objective.

Fund manager's report

Source : Groupama AM

July 2025 saw the continued upward momentum of the equity markets (S&P 500 +2.2%, Nasdaq +3.7%, Russell 2000 +1.7%, Eurostoxx50 +0.5%, Stoxx600 +1.0%, Nikkei +1.4%, MSCI Asia ex Japan +1.1% performance in local currencies with dividends reinvested). Equities were buoyed by strong corporate earnings, solid macroeconomic data (stable job market and 3% GDP growth in the US in Q2), and easing tensions on the tariff front (US agreements with Japan, the EU and South Korea). In addition, the FED and the ECB decided to keep their interest rates unchanged. Against this backdrop, yields remained broadly contained: the US 10-year yield was stable at around 4.4%, while the German Bund yield rose slightly from 2.6% to 2.7%. In credit, the 5-year X-Over continued to tighten, reaching 268bp. Brent crude rose to \$72, while the EUR/USD fell from 1.18 to 1.14 at the end of the month.

Allocation: we maintained our allocation to risky assets slightly above the pivot point over the month. In July, the Trump administration concluded major tariff agreements with a number of countries and regions, notably with the European Union. Despite new, less favourable conditions, these agreements give visibility to companies and investors by establishing a new framework. The earnings season began in July and was marked by very good results for US technology stocks driven by artificial intelligence. Some European companies have been negatively affected by the rise in the euro, which has had a negative currency impact. Equity segment: the equity segment posted a positive performance in July, outperforming the MSCI World Index thanks to the industrial sector (United Rentals, Caterpillar and electrification stocks) and the healthcare sector (AstraZeneca, UCB, etc.). Over the period, we trimmed our positions in Eli Lilly and Essilor, notably to add to Intuitive, Eon, Amazon and Nextera. We also initiated two positions in Sprouts Farmers, a US distributor specialising in natural and organic products, and in Wheaton Precious, a Canadian company producing precious metals (gold, palladium, cobalt, etc.).

Credit segment: the portfolio's credit segment rose in July, slightly underperforming the its benchmark index due to its underweighting in credit at the long end of the curve. As the rally continued and the EUR IG credit spread fell below 80bp in late July, the long segments (>7 years) performed best in terms of both excess and total return, while at the same time sovereign yields rose by around 10bp. The exposure to subordinated bonds issued by financial and non-financial companies was positive, as was the diversification into HY bonds. Our participation in the primary issue in June by Webuild, an Italian company specialising in complex infrastructure (transport, hydropower, civil engineering projects) with a 2030 maturity and offering a yield of over 4%, made a positive contribution to performance in July.

Key ESG performance indicators

	Fund coverage ratio(*)	Fund	Universe		Fund coverage ratio(*)	Fund	Universe
 Carbon intensity	100%	328	442	 Board Gender Diversity	100%	39%	34%

(\*) The coverage ratio is the percentage of stocks that contribute to the ESG indicator score  
For definitions of ESG performance indicators, please refer to the last page of the document.

Portfolio ESG score

	Fund	Universe
 Overall ESG score	70	52
Coverage rate	100%	100%

Score for E, S and G factors

	Fund	Universe
Environment	60	52
Social	65	50
Governance	62	50

Levels A B C D E refer to the five equal portions (quintiles) into which the universe is divided, with A being the best score and E the worst.

ESG performance indicators definition

Carbon intensity

The carbon intensity is the weighted average greenhouse gas (GHG) emissions per million euros of revenue. Scope 1, 2 and 3 emissions are taken into account. Scope 1 and 2 correspond to emissions directly emitted by the company and those indirectly linked to its energy consumption. Scope 3 emissions are those emitted by the company's suppliers and those emitted during the use and end of life of the products it creates. Source: MSCI, Groupama AM calculations.

Green Part

The green share is the percentage of a company's revenue devoted to economic activities that contribute positively to energy and ecological transition. Source: Clarity AI, Groupama AM calculations

Implied temperature

Implied temperature is the difference between a company's projected carbon intensity trajectory and the reference trajectory of a climate scenario compatible with the Paris Agreements. Source: MSCI, Groupama AM calculations.

Net job creation

Average percentage of growth in number of employees over one year. Source: MSCI, Groupama AM calculations.

Training hours

Average number of training hours per employee per year. Source : MSCI, Groupama AM calculations.

Independence of directors

Proportion of portfolio made up of companies in which independent directors form a majority on the Board of Directors or Supervisory Board. Source: MSCI, Groupama AM calculations.

Board Gender Diversity

Average ratio of female to male board members in investee companies, expressed as a percentage of all board members. Source: Clarity AI, Groupama AM calculations
