Fund manager's report

Markets over the period: Equity markets posted mixed performances. Major US tech stocks were more resilient, while small-caps and European equities were hit by the sharp rise in interest rates (S&P 500 -0.35%, Nasdaq +1.9%, Russell 2000 -5.3%, Stoxx 600 -2.4%, Topix -0.3%, MSCI Asia ex-Japan -0.3%, performances in local currencies). In Europe, the CAC 40 continued to underperform (-4.2%) amid uncertainty over the budget and the forthcoming presidential election. The bond market had a difficult month (with US and German 10-year yields rising by +53bp and +26bp respectively, while the OAT-Bund spread widened to 130bp). The Federal Reserve raised its key rate by 25bp to 3.75%-4.00%, its first hike since 2023. Despite this pressure on interest rates, the Nasdaq was buoyed by continued optimism around AI. In this environment, credit spreads widened by around 50bp to 301bp. The euro depreciated by around 2.5% against the US dollar, to 1.133 dollars, while Brent crude rose by +14.4% to end the month at around $103.5 per barrel, against a backdrop of persistent geopolitical tensions. Convertibles universe: The FTSE Refinitiv Eurozone Euro Only Currency Index fell in September (-1.10%). Convertible bonds remained resilient, despite the significant upward pressure on yields, delivering a performance in line with equities once adjusted for their equity exposure (around 40%). They outperformed credit, which was hit by the dual impact of rising interest rates and widening credit spreads. High Yield (BofA Euro High Yield -1.79%) and Investment Grade (BofA Euro Corporate -1.37%) were both down. Against this backdrop, the European convertible primary market was active, with more than €2bn in issues: Deutsche Börse (€600m), Soitec (€500m), Accor (€380m), BW LPG ($300m) and Porr AG (€150m). Portfolio and outlook: The fund slightly outperformed its benchmark this month due to favourable stock-picking. Our overexposure to the tech sector, with AT&S, Soitec and ASML, made a positive contribution. Similarly, our underexposure to the real estate sector (Vonovia, Leg Immo) and the absence of exposure to certain French stocks such as Kering, Vinci and Accor were positive factors. On the contrary, our overexposure to Airbus, Rheinmetall, SAP, Webuild and MTU Aero was costly in relative terms. The portfolio's equity hedges made a positive contribution (+5bp), as did our hedge on France via the OAT-Bund spread (+2bp). Over the period, we bought/added to our positions in convex convertible bonds such as Soitec 2033, Rag/Evonik 2031 and Lufthansa 2032. In return, we sold/trimmed our positions in the Elis 2029, SPIE 2028 and AT&S Perp convertible bonds (taking profits on equity-style convertible bonds) as well as CMA/Air France 2028. Cautious portfolio bias: At the end of the period, the equity exposure was neutral against the benchmark, the fund was underexposed to credit risk and slightly overexposed to modified duration. The fund maintains equity hedges against the Eurostoxx 50 index to increase the fund's convexity.

ESG performance indicators definition

Carbon intensity

Carbon intensity corresponds to the weighted average of greenhouse gas (GHG) emissions per million euro of turnover of the issuers invested in.
Scope 1, 2 and 3 upstream emissions are taken into account.
Scope 1 emissions correspond to emissions directly emitted by the company, while scope 2 emissions correspond to indirect emissions linked to its energy consumption. Upstream scope 3 emissions are all other indirect emissions generated upstream of the production activity.
