Fund manager's report

Markets over the period: In December, markets performed negatively in both Europe and the United States. Equities (S&P -5.8%, Nasdaq 100 -9.0%, Stoxx 600 -3.4%, Nikkei -6.6%, MSCI Asia ex. Japan -0.3% in local currency) suffered from recession expectations and the firm stance of the ECB and the Fed regarding the continuing fight against inflation. Both central banks announced a 50bp hike in their key rates while US inflation came in at 7.1% year-on-year, slightly below expectations. Yields and credit spreads rose over the month (the US 10-year yield rose from 3.6% to 3.9%, the German 10-year from 1.9% to 2.6% and the Crossover was up 20bp). Lastly, the dollar continued to fall against the euro (from 1.04 to 1.07). Convertibles universe: the Refinitiv Eurozone Euro only index fell by -0.69% over the month, outperforming its theoretical delta in relation to the fall in euro equities (Eurostoxx -3.5%). Note that since 01/12/2022, the fund now has Refinitiv Eurozone Euro only as its benchmark index (previously it was Exane ECI Euro). The primary market remained calm in Europe with no new issues in December. Portfolio and outlook: the fund performed in line with its benchmark this month. The defensive positioning, both in delta and credit, was positive. In convertible bonds, our underexposure to GTT (+10), KPN (+4) and Cellnex (+2) made a positive contribution. The negative contributions relative to the index were due to underexposure to Delivery Hero (-12), Elis (-5), Just Eat Takeaway, etc. Similarly, the convertible bond segment made a negative contribution (-5) with -9bp on credit and +4bp on equities thanks to Sanofi and Iberdrola. On the contrary, the hedges contributed positively with +10bp on equities and +11bp on interest rates. Within the portfolio, purchases were mainly made in the primary credit market, notably Auchan 2028. In exchange, we sold/trimmed MTU Aero 2027 and Artemis/Puma 2025 following the rebound in the underlying shares. Conservative portfolio bias: the portfolio's beta remains defensive, with the fund's equity exposure at the end of the period remaining well below that of its benchmark, and also a more cautious credit positioning.

ESG performance indicators definition

Carbon intensity

The carbon intensity is the weighted average greenhouse gas (GHG) emissions per million euros of revenue. Scope 1, 2 and 3 emissions are taken into account.

Scope 1 and 2 correspond to emissions directly emitted by the company and those indirectly linked to its energy consumption. Scope 3 emissions are those emitted by the company's suppliers and those emitted during the use and end of life of the products it creates.

Source: Iceberg Data Lab, Groupama AM calculations.

Green part

The green share is the percentage of a company's revenue devoted to economic activities that contribute positively to energy and ecological transition.

Source: Iceberg Data Lab, Groupama AM calculations

Implied temperature

Implied temperature is the difference between a company's projected carbon intensity trajectory and the reference trajectory of a climate scenario compatible with the Paris Agreements.

Source: Iceberg Data Lab, Groupama AM calculations.

Net job creation

Average percentage of growth in number of employees over one year.

Source: Moody's ESG, Groupama AM calculations.

Training hours

Average number of training hours per employee per year.

Source : Vigeo Eiris, Groupama AM calculations.

Human rights policy

Proportion of portfolio made up of companies that have implemented a human rights policy.

Source : Moody's ESG, Groupama AM calculations.

Independence of directors

Proportion of portfolio made up of companies in which independent directors form a majority on the Board of Directors or Supervisory Board.
