Fund manager's report

Source : Groupama AM

Equity markets generally fell back in December, driven in particular by renewed fears of rate hikes by the world's main central banks. In a difficult environment for growth stocks, your fund fell by more than its benchmark.

Among the fund's gains, in a context where company news has generally been fairly quiet, we note the rebound of Interroll (conveyor systems, +6.7%), MIPS (security systems, +6.6%) and Teleperformance (customer relations outsourcing, +3.4%), the latter being supported by the announcement of an agreement with the services trade union federation UNI Global Union.

FincoBank (Italian bank specialising in online brokerage and asset management, +0.5%) also performed well, with good net inflow figures of €480m in November, the addition of over 10,600 clients and confirmation of the success of the asset management business, whose take-up has risen from 27% to 30% in one year in retail banking.

Soitec (semiconductor materials, -0.5%) also reported good news, with the signing of a strategic partnership with STMicroelectronics in SmartSIC, Soitec's silicon carbide technology. Silicon carbide is a material that enables high performance gains in the field of power electronics, particularly for electric vehicles. This agreement is an important validation of the added value of SmartSIC compared to traditional silicon carbide by one of the major players in the sector (\$700m turnover expected in this field in 2022).

After two months of strong performance, Watches of Switzerland (luxury watches and jewellery, -22%) fell heavily on the occasion of its half-year results, which were in line with its forecasts, with sales up by 31% (including 44% organic in the US) and an EBIT margin of 11.3%. The only disappointment was free cash-flow, but for reasons that were clearly detailed by management (increase in inventories linked in particular to acquisitions, shop openings, foreign exchange and the availability of certain products before the Christmas season).

Another poorly received publication was that of Carl Zeiss Meditec (solutions for eye and brain surgery, -8.7%). The results for its financial year ending September were nonetheless excellent: sales of €1.91bn and EBIT of €397m (20.6% margin) were significantly better than expected. However, the 2022-23 financial year is expected to be less successful, hampered in particular by excess inventory in China and by a reduction in reimbursements in Korea for certain product categories.

ESG performance indicators definition

Carbon intensity

The carbon intensity is the weighted average greenhouse gas (GHG) emissions per million euros of revenue. Scope 1, 2 and 3 emissions are taken into account.

Scope 1 and 2 correspond to emissions directly emitted by the company and those indirectly linked to its energy consumption. Scope 3 emissions are those emitted by the company's suppliers and those emitted during the use and end of life of the products it creates.
