## Fund manager's report

In December, bases were again very volatile. At the beginning of the month, they fell sharply after the publication of a fall in US CPI, which weighed on the fund's performance. We nonetheless took advantage of this downturn to increase our long basis segment. This tactical repositioning paid off in the second half of the month, which was marked by an upward movement in these bases, a move rooted in the hawkish focus of ECB members. Also, in the run up to the holiday season, which was a period of low liquidity, we temporarily reduced our alpha compartment. Our play on the IG against HY widening paid off slightly over the period. Lastly, we note the neutral contribution of our idiosyncratic bets over the period.

## ESG performance indicators definition

### Carbon intensity

The carbon intensity is the weighted average greenhouse gas (GHG) emissions per million euros of revenue. Scope 1, 2 and 3 emissions are taken into account.

Scope 1 and 2 correspond to emissions directly emitted by the company and those indirectly linked to its energy consumption. Scope 3 emissions are those emitted by the company's suppliers and those emitted during the use and end of life of the products it creates.
